

MUNAS III APTRINDO

**PT LANCARJAYA
NUSANTARA ENJINIRING**

Jakarta 19-21 Mei 2026

**PT LANCARJAYA
NUSANTARA ENJINIRING**

The advertisement features a dark blue background with light blue streaks. At the top center is the FAW logo, a stylized '1' inside a circle. Below it, the text 'JH6' and 'JK6' are displayed in large, glowing blue letters. Under 'JH6' is 'JH6 SERIES' and under 'JK6' is 'JK6 SERIES'. Below the text are two trucks: a red FAW JH6 truck on the left and a white FAW JK6 truck on the right. Both trucks are shown from a front-three-quarter view. At the bottom left is the LANCARJAYA NUSANTARA ENJINIRING logo. At the bottom right is the 'Euro 5' logo and the text 'OFFICIAL DEALER OF FAW TRUCKS INDONESIA'. At the very bottom, there is a small address, a phone number, and social media handles.

OUR PRODUCT AND VALUE

Brand Layout 品牌布局

A development course of over 71 years, FAW has established a global and multi brand R&D layout
Independent brands such as Hongqi, FAW TRUCKS, and BESTUNE, as well as joint venture brands
Such as Volkswagen, Audi, Toyota, and Jetta, with industry-leading brand coverage

经过 71 年的发展，中国一汽已构建起全球化、多品牌研发布局
拥有红旗、解放、奔腾等自主品牌，以及大众、奥迪、丰田、捷达等合资品牌，品牌覆盖行业领先

Technical Strength 技术实力

The production and R&D setup encompasses 3 assembly bases and 5 manufacturing bases.

The R&D team has more than 4,000 members, with an annual investment of \$430 million. Accurately grasp the market demand, maintain a leading edge in the fierce market competition with technological innovation

研发团队4000余人, 年投入4.3亿美元。准确把握市场需求, 在激烈的市场竞争中, 以技术创新保持领先优势

HISTORY OF PT LNE

PT. LancarJaya Nusantara Enjiniring (LNE)

PT LNE was established in year 2019 and has been an authorized official importer and distributor of FAW TRUCKS in Indonesia since 2023. Our mission is to contribute to the development of Indonesia's economy by providing integral transportation solutions through trusted products, services, and spare parts for all our customers.

Our Vision & Mission

Vision

To be involved in the development of the world, by being a world-class company that provides the most trusted transportation solutions.

Mission

Contribute to the development of Indonesia's economy by providing value-added solutions through trusted products, spare parts and after-sales service that will optimize customer satisfaction and loyalty.

Core Values

- **CREATE SUCCESSFUL CUSTOMERS** our company exists to help customers attain success. Decisions are made and measured based on how well it serves our customers.
- **CONTINUOUSLY IMPROVE** our company commits to continuously invest in the growth of our team. Team members are also advised to actively take responsibility for their own self-development.
- **INTEGRITY** our company aspires to always do the right thing, act truthfully and with honor, even when no one is watching.

JK6 Series | Euro 5

**JK6 is the key to success
for your business mobility.**

JK6 Series

FAW JK6

Chassis Information

Sturdy and Safe Frame

DP590 high-strength steel material, all-metal frame structure. Meets dual national and European safety standards to ensure user safety in all aspects.

Brake System

- Brake shoe width increased to 180mm
- Enlarged brake air chamber
- Extended adjustment arm
- 10% better than competitors
- ABS (Anti-lock Braking System)

Strong and sturdy differential and drive shaft

Wide-body bearings for transmission shafts improve the connection between the function pipe and copper. These bearings offer high sealing, corrosion resistance, and high reliability.

Wind Deflector

An aerodynamic component above the cabin that functions to divide the wind, reduce air resistance (drag), and increase fuel efficiency by making the air flow smoother over the tub/container.

Flexibility of View

The instrument panel is designed with a low profile, providing a wide top and bottom view. Optimized rearview mirrors and blind spot mirrors provide clear indirect visibility and minimize blind spots. Fast defrosting speed and wide coverage make driving safer in winter.

Strong Cab and Bumper

Gas-powered double front panel, tough and majestic large-scale three-dimensional eagle logo, luxurious and eye-catching. Integrated metal bumper, reliable and safe Non-metallic anti-slip pedal, beautiful and comfortable

LED Lights

3-in-1 LED daytime running lights Main and auxiliary high beam lights with high brightness, practical and safe

Easy Maintenance

The chassis and body wiring harness is optimized for a neat and reliable layout, making maintenance lighter and easier.

Full Power EURO 5 Standard
The savings are more than expected

FUEL PRIMARY FILTER

TIPS

-  Drain water regularly
-  Replace filter element on time
-  Pump oil to bleed

**More big and transparent filter
so it is easy to check**

JK6

EFFICIENT AND ENERGY-SAVING

RELIABLE AND DURABLE

ENGINE CA6DL1 32E5

1. FAWDE CA6DL1 Engine: Powerful power, Energy Efficiency, and Reliable.
2. Fuel Efficiency: Visco fan silicon and Electronically controlled air ducts save fuel effectively.
3. Engine Techonology common rail: High-pressure common rail engine generates superior power and fuel efficiency.

Transmisi FAST-9JSD135T-B

1. Wider engine power range, greater torque, and better reliability.
2. High transmission efficiency and smooth, easy gear shifting.

AXLE 457

13-ton Jiefang rear axle with a speed ratio of 5.286, which is suitable for complex working conditions in Indonesia: strong bearing capacity, high output torque, and low failure rate. Equipped with long oil change as standard.

JK6 Line Up

JK6 290 TH 4X2 Tractor Head

Designed for towing light to medium-duty trailers with high efficiency on distribution routes. Agility, economy, and ideal for intra-city and inter-city logistics operations.

JK6 290 RW 6X2 Rigid Chassis

Designed for bodywork applications with high transport efficiency and flexibility. Suitable for large-volume distribution, this lightweight, stable, and economical configuration is ideal for operation.

JK6 320 TH 6X4 Tractor Head

Designed as a trailer-towing unit for a flexible, integrated transport system. Ideal for regional distribution, it efficiently connects various types of trailers, from containers to flatbeds to tanks.

JK6 320 RH 6X4 Rigid Chassis

Designed as a flexible base for a variety of bodywork applications, tailored to operational needs. Strong, stable, and ready to be adapted for dump trucks, cargo trucks, tankers, and other specialized vehicles.

JH6 Series

JH6 Series

**The JH6 Dump truck family
mastering excellent quality.**

As firm as a rock

JH6 dump truck, as one of the star products of FAW Trucks, boasts a square and mighty appearance, a solid and reliable chassis, and excellent performance.

Convex sun visor

With the large light blocking area, it increases the driving safety, and the double clearance lamps, with the strong visibility and long distance, guarantee the driving safety at night.

Advanced painting technology

The overall electrophoresis + robot fully automatically spraying finish paint, which is uniform, bright and fadeless is adopted for the cab; the primer + overall painting is adopted for the frame, and the double-layer paint film is more corrosion-resistant.

High-strength longitudinal beam

The high-strength 700L steel, 15000 tons of rolling process, one-time molding of the longitudinal beam are adopted, and the frame rigidity and strength are leading in the industry; there are different specifications of double-layer plates and three-layer plates, which can meet various working conditions such as urban construction slag, engineering materials, mining and so on.

High throughput

The ground clearance of key components is more than 610mm, and the minimum ground clearance is 314 mm, with the better throughput, which is more suitable for harsh dumping conditions.

Key Electrical Remote

This unit is equipped with an integrated electric remote for one unit, making it easier for the driver and operational.

All-steel cab

The all-steel fully enclosed cab meets the European standard ECE-R29 Occupant Protection Regulations; 100% rain test, effectively ensuring the tightness

Double I-bar V-shaped arrangement

Exclusive patent of FAW Trucks, high strength, high tensile strength; anti-roll, easy disassembly and maintenance.

Strong braking force

The brake pressure is 12 bar, which is large. For mountainous and hilly conditions, the hydraulic retarder is optional, which makes the brake distance shorter and more timely.

Efficient Power

The engine combined with the JH6 dump truck has achieved internationally advanced standards in terms of economy, power, and durability. The transmission boasts mature technology, reliable quality, and easy operation. The drive axle boasts excellent performance and strong stability. The drive system reduces operating costs throughout the vehicle's entire lifecycle and increases vehicle attendance. Lancarjaya Nusantara Enjiniring has a flagship product, the JH6 350. This unit is one of the best-selling models and comes with the following features:

ENGINE FAW CA6DL3-35E5

1. Torque up to 1650 N·m
2. Fuel Efficiency 5-10%
3. Cooling Module - Integrated Filtration
4. Common rail system
5. Engine Brake

GEARBOX FAST

1. Full synchronisation system
2. Wider gear ratio - Fuel Efficiency
3. Large gear ratio - Stronger Power

AXLE REDUCTION WHEEL TYPE 300

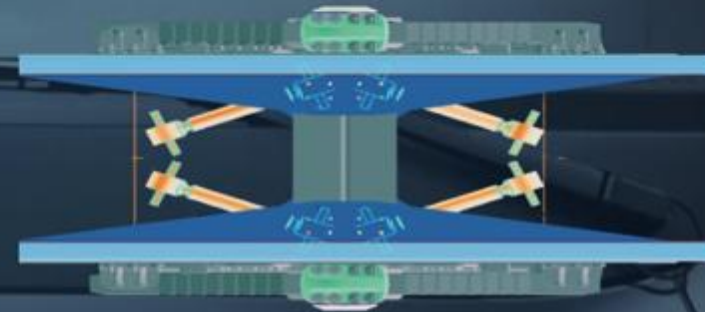

1. Designed for construction and mining trucks
2. Extreme water and mud resistance
3. Superior braking system
4. With double reduction hub (final drive)

JH6

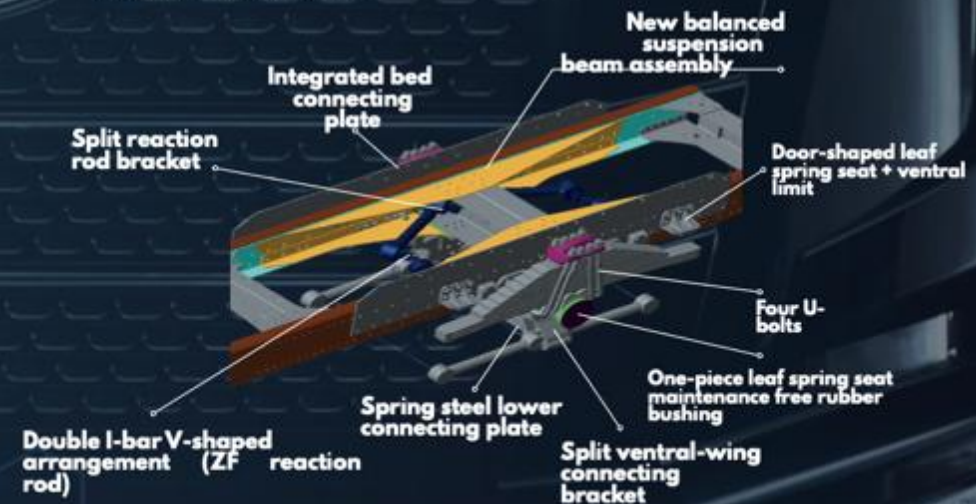

High reliability: Double I-bar suspension

1. Adopting FAW Jiefang patented double I-bar V-shaped arrangement, with stronger anti-rolling ability and better stability
2. Thrust rods are imported from Germany ZF company, with longer service life of ball joint and better reliability
3. More convenient disassembly and assembly, low maintenance and use cost

High reliability: The overall structure of the new 4U balanced suspension I-bar suspension

Easy Maintenance

JH6 Line Up

JH6 350 RD 6X4 Chassis

Equipped with great power and a tough 6x4 configuration on project terrain, ready to work hard for various needs, this chassis can be used for several types of trucks, including:

Fuel Truck

Water Truck

Mixer Truck

Construction Truck

JH6 350 RL 6X4 Logging Truck

Designed for transporting logs in rugged and challenging forest terrain. Strong, stable, and reliable, it handles long log loads with robust performance on every track.

JH6 350 RC 6X4 Coal Hauling Truck

Equipped with a powerful 350 horsepower and a tough 6x4 configuration on project terrain, it is ready to work hard to transport soil, sand and rocks without compromise.

JH6 Line Up

JH6 420 RC 8X4 Coal Hauling Truck

Specifically designed for heavy mining operations with 420HP power and a stable 8x4 configuration in extreme terrain.

JH6 420 RN 8X4 Nickel Hauling Truck

Specifically designed for heavy duty operations and extreme terrain such as nickel with 420HP power and 8x4 configuration.

JH6 420 TH 6X4 Tractor Head

A 420 HP heavy-duty tractor head designed for logistics and heavy hauling operations, with robust performance, fuel efficiency, and a comfortable cabin.

JH6 550 TH 6X4 Tractor Head

550 HP heavy-duty tractor head designed for heavy hauling and logistics needs, with powerful 550 hp performance, a modern cabin, and maximum comfort
