# Why This Forum?

From Commitment to Investment

## Indonesia has committed.

Indonesia adopted IBSAP 2025–2045 and committed to the Kunming-Montreal Global Biodiversity Framework, setting ambitious targets for halting biodiversity loss.

## Public finance alone won't close the gap.

Achieving these targets requires mobilizing private capital at scale — government budgets cannot cover the estimated biodiversity financing needs.

## But biodiversity IS the business opportunity.

Indonesia's natural capital offers untapped commercial potential across cosmetics, regenerative agriculture, marine economy, sustainable forestry, tourism, and healthcare.

## Establishing policy-business connectivity

Translate policy commitments into investable opportunities and to connect them with private-sector capital and innovation.

→ This public-private exchange creates that platform.

## THE RATIONALE

# Turning biodiversity commitments into investable action

Indonesia has strong biodiversity assets and a clear policy direction through IBSAP. The next challenge is to convert this momentum into investable opportunities that can mobilize private capital.

## THREE CORE PROCESSES

1

### IDENTIFY

Prioritize  
**IBSAP-aligned  
biodiversity  
challenges with  
investment  
potential.**

2

### MOBILIZE

Engage companies,  
financiers,  
government, and  
**ecosystem partners**  
around practical  
instruments.

3

### ACTIVATE

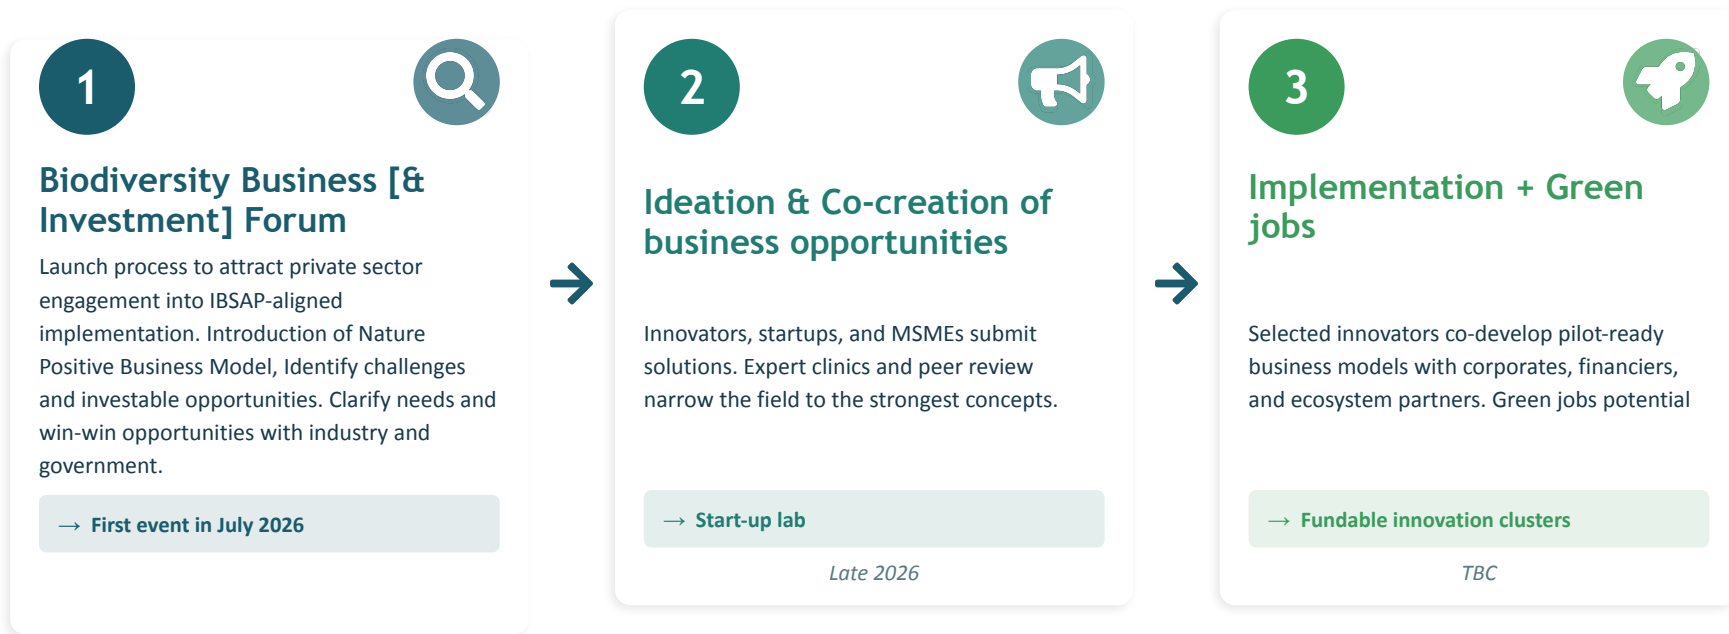

Translate interest  
into MoUs,  
partnership  
roadmaps, and  
**pilot-ready** investment  
concepts.

## Long Term Expected Result

A stronger pipeline of nature-positive business models ready for collaboration and financing.

# Framework of process: From Challenges to Investable Solutions

*Biodiversity challenges are translated into opportunity statements, matched with private sector innovators, and developed into fundable pilot concepts through a staged process.*

# Biodiversity Business Forum Indonesia

## OBJECTIVE:

To translate IBSAP-aligned biodiversity finance challenges into investable, pilot-ready innovation concepts through a staged process of challenge framing, ideation, and co-creation.

# Date and Venue

**AYANA Midplaza Jakarta**

23 July, 2026

# Opening Remarks *Host Welcome & Setting the Scene*

## Mohammad Jumhur Hidayat

Minister of Environment and Head of the Environmental Protection Agency

**Kementerian Lingkungan Hidup (KLH)**

### *Host Welcome*

#### **Expected outcome:**

Participants leave with a clear understanding that KLH is inviting the private sector not only to support IBSAP 2025 - 2045, but to become active partners in turning Indonesia's biodiversity into concrete investment, innovation, and partnership opportunities.

*\*Photo placeholders — to be replaced with official photos.*

#### **Proposed Key Talking points:**

1. KLH's vision for private sector engagement in IBSAP 2025 - 2045.
2. Explain the regulatory framework: IBSAP targets related to private investments and contributions.
3. Government needs business, investors, and innovators as partners
4. The invitation to co-invest in Indonesia's natural capital.
5. Leave the roundtable with one opportunity, one partnership, and one commitment

# Opening Remarks

*Host Welcome & Setting the Scene*

## Opening Speech by German Embassy

### Thomas Graf

Deputy Head of Mission of  
the German Embassy to  
Indonesia, ASEAN and Timor  
Leste

## *Setting the Scene*

### Expected outcome:

To reaffirm Germany's commitment as a long-term partner of Indonesia in biodiversity conservation and sustainable development, while encouraging participants to translate the bilateral cooperation agenda into concrete partnerships, private sector engagement, and follow-up action through the forum and roundtable process.

### Proposed Key Talking points:

1. Germany's **commitment to biodiversity conservation and sustainable development in Indonesia**, and the bilateral cooperation context.
2. The role of German development cooperation in **connecting policy implementation, innovation, finance, and private sector** engagement.
3. The importance of mobilizing companies, investors, innovators, and financial institutions **to turn biodiversity commitments into practical and scalable solutions**.
4. Germany's invitation for partners to use the forum and roundtable session as a **starting point for concrete collaboration, co-investment, and follow-up action**.

## High-Level Panel

# From Biodiversity Commitment to Investment: Mobilizing Business, Finance, and Innovation for Indonesia's Nature-Positive Economy

The key outcome of the High-Level Panel is a shared strategic understanding among government, business, investors, and innovation actors on how Indonesia's biodiversity agenda can be translated into market action, private investment, and scalable nature-positive solutions.

## Topic of Discussion

Participants understand the government's vision for private sector engagement in IBSAP 2025–2045, including the **regulatory direction, priority biodiversity agenda, and the invitation** for companies to invest in Indonesia's natural capital.

Kementerian  
Lingkungan Hidup

BAPPENAS connects biodiversity with Indonesia's broader **development priorities, showing how biodiversity investment can support economic resilience, regional development**, green growth, and long-term national competitiveness.

BAPPENAS

Habibie Innovation Incubator demonstrates that **biodiversity challenges can become innovation opportunities**, especially through startups, technology, applied research, and pilot-ready solutions.

Habibie Innovation  
Incubator

KADIN signals that business participation is essential and **encourages companies to identify where biodiversity connects with their supply chains, investment priorities**, sustainability commitments, and market opportunities.

KADIN

DANANTARA brings the financing and investment perspective by **explaining what is needed to make biodiversity-related opportunities credible, scalable**, and attractive for investors.

DANANTARA

IBCSD shows how companies can integrate biodiversity into corporate practice, **including ESG, procurement, reporting, value chains, partnerships, and** long-term sustainability strategies.

IBCSD

## EXPECTED RESULTS

Shared direction on how biodiversity can become business and investment opportunity.

Clear entry points for private sector contribution.

Key barriers and enablers to unlock nature-positive investment.

Strategic direction for the roundtable discussion and follow-up process.

THANK YOU
